

## **PYRAMIDION TWIN**

**An interactive beacon is born in London**

**A contemporary artwork by Milene Guermont  
illuminates at TRINITY HOUSE all the evenings of this summertime.**

*PYRAMIDION TWIN* is the continuation of the monumental sculpture *PHARES*, imagined by the artist-engineer [Milène Guermont](#). The pyramid is 30 m tall and was born on Place de la Concorde in 2015 ([movie](#)), from where it dialogues with the Obelisk of Luxor and the Eiffel Tower ([movie](#)).

*PYRAMIDION TWIN* is an interactive sculpture of golden metal & light measuring 4 m in height, born on June 23, 2018 in front of Trinity House. As the Obelisks are designed in pairs, a twin work, *PYRAMIDION*, is born in Paris in February 2018 and is now floating on the Seine River.

Each evening this summer, the *PYRAMIDIONS* light up automatically. But, at special moments, you can also have a chance to illuminate this luminous pyramid: by placing your finger into a connected cardiac sensor the pyramid pulsates according to your own heartbeat.

The *PYRAMIDIONS* will also communicate together on September 14: someone in London can light up in Paris.

There is also a distance connection at any time: by using [www.youlightme.com](http://www.youlightme.com) you can personalize a short video of *PYRAMIDION* that pulsates at your own heartbeat and share it by email or your social networks.

Supported by the French National Commission for UNESCO and with the label "2018, European Year of Cultural Heritage," *PYRAMIDION TWIN* will travel. To welcome it to your country, please contact us.

*PYRAMIDION* at UNESCO

*PHARES* on Place de la Concorde by night & by day

**MILENE GUERMONT**, born in France in 1981, has trained as both an artist and an engineer. Following a synesthesia caused by touching a concrete wall, she transforms the material into sensitive pieces. Weighing anything from a few grams to several tons, her works in Polysensual Concrete react according to your magnetic field by touching them. Some of her artworks are permanently installed on classified areas such as *CAUSSE* in Paris or *INSTANTS* on Utah Beach.
